

Experiences GO

The best **mobile application** for the **distribution of on-site services**.

- ✓ Have a fully integrated multilingual application with your Juniper Booking Engine.
- ✓ Works offline with a previous initial connection.
- ✓ Instantly confirm the reservation, apply discounts, and get upgrades on-site.
- ✓ It has an integrated shopping cart to make multiple reservations for different products simultaneously.
- ✓ Check, modify, and cancel reservations from the application.

Experiences Hub

The application that allows your **client to take control of their travel experience**.

- ✓ Multilingual application available in English, Spanish, French, and Portuguese.
- ✓ Contact with the representative.
- ✓ Access quickly to update the details of the contracted trip.
- ✓ Registration process through email or Whatsapp to receive notifications.

Airport GO

The online application designed specifically for your airport guides.

 **Meet & Greet:** Offers assistance to passengers upon arrival at the airport.

 **Controller:** Allows monitoring and controlling the number of transfers per hour and the arrival times of passengers on the corresponding flights.

 **Departure Traffic:** Enables knowing which transfers they should perform based on the departure flights from the origin airport.

 **Drive App:** Facilitates viewing the stops that the carrier must make before reaching the final destination through the application.
